### **Installation**

These scenarios are packaged in the same ".rwp" file. Install it through the Train Simulator 2012 package manager. The 7 first scenarios were fully upgraded or rebuilt to work in TS2012 and old German Railroads' content was replaced with similar virtualRailroads' one. The 3 last ones were already released in the "Advent scenario pack 2011".

### **Remark**

The first version of some of the 7 first scenarios required some German Railroads' stuff that has been replaced with virtualRailroads' one in the actual version. You can find these old versions in a folder included in this package, but no more support will be given for them. If you want to install them, delete the actual version of the selected scenario in TS2012 editor and then install the GR version of the scenario through the package manager.

### **Thanks**

I'd like to thank all route and rolling stock/reskin creators.

Thanks to:

- Ralf Kroneberg for the german translations.
- Etienne Ammerdorffer for the dutch translations.
